PROJECTS

BLOG WEBSITE (REACT JS)   Jan 2024 – Feb 2024

- Blog website offers users the ability to sign up or log in, allowing them to create their own posts and visit posts created by both themselves and other users.
- Uses APPWRITE for common backend functionalities, such as user authentication, database management.
- Uses Redux to manage the state of an application in a predictable and centralized manner.
- Uses React-Hook-Form to simplify the process of managing forms in blog website.
- Uses Real Text Editor in creation of post which is type of text editor that provides formatting options beyond plain text.
- Uses React-Router-Dom to create a single-page application (SPA) with multiple views or pages, updating the UI based on the URL.

NEWS WEBSITE (REACTJS & JAVASCCRIPT)   Dec 20,2023 – Dec 27, 2023

- Fetching of data from News API
- Using React-Router for Routing.

ALARM CLOCK (JAVASCRIPT)   Dec 10,2023 – Dec 17, 2023

- Empower users to set personalized alarms at their desired times.

For More Projects i.e (Currency Converter, Todo List, and Password Generators etc.)
